

Parent Access To Canvas

Go to <https://canvas.cmslearns.org/discovery/>

Choose Parent/Guardian/Observer Login on the right.

If you already have an account, login.

If you need to create an account, click on the link in the top right of the corner.

Complete the registration information to set up your account. You will need the pairing code from the student.

The image shows a browser window with a registration form for Canvas. The form includes fields for "Your Name", "Your Email", "Password", and "Re-enter Password". A "Parent Signup" button is visible in the top right. A "What is a pairing code?" section contains a text box with a redacted pairing code. At the bottom, there are "Cancel" and "Start Participating" buttons. A green bar highlights the "Start Participating" button area. A red bar highlights the "What is a pairing code?" section. A blue bar highlights the "Start Participating" button.

Pairing codes can be generated by a student or on behalf of a student by Canvas Admin.

Once generated, the pairing code can only be used to link the student who created the code or had the code created on their behalf.

Additional pairing codes must be created for each student that will be linked to an observer.

Once you place the pairing code in the text box, you are able to click the blue Start Participating Button on the bottom right.

Then you should have access to view the selected student's Canvas course.
